# A CHRONOLOGICAL LIST OF PUBLICATIONS ON LIQUEFIED-GAS AEROSOLS[1/]

By R. A. Fulton
Division of Insecticide Investigations

## 1942

Billings, S. C., Goodhue, L. D., and Sullivan, W. N. A pyrethrum-sesame oil aerosol used against cheese skipper adults. (Scientific note) Jour. Econ. Ent. 35: 289-290.

Goodhue, L. D. Insecticidal aerosol production. Spraying solutions in liquefied gases. Indus. and Engin. Chem. 34: 1456-1459.

---- and Sullivan, W. N. The preparation of insecticidal aerosols by the use of liquefied gases. U. S. Bur. Ent. and Plant Quar. ET-190, 3 pp. [Processed.]

Roark, R. C. Definition of aerosol. Jour. Econ. Ent. 35: 105-106.

Sullivan, W. N., Goodhue, L. D., and Fales, J. H. Toxicity to adult mosquitoes of aerosols produced by spraying solutions of insecticides in liquefied gases. Jour. Econ. Ent. 35: 48-51.

## 1943

Creighton, J. T. Household pests. Univ. Fla. Agr. Ext. Bul. 122, 55 pp.

Goodhue, L. D. Insecticidal aerosols. Pests 11(1): 12.

---- New mosquito-control method, developed for Army, described. New York Herald Tribune, Nov. 21, 1943. Sect. VIII, p. 15 (Reprinted in book "1943 New York Herald Tribune Forum" under title "War Against Mosquitoes", pp. 162-166, 1944).

---- and Sullivan, W. N. Making and testing aerosols. In "Laboratory Procedures in Studies of the Chemical Control of Insects". Amer. Assoc. Adv. Sci. Pub. 20, pp. 157-162.

McGovran, E. R., Fales, J. H., and Goodhue, L. D. Testing aerosols against houseflies. Soap and Sanit. Chem. 19(9): 99, 101, 103, 105, 107.

---

1/ With the exception of publications in the E and ET series, copies are not available for distribution.

Monro, H. A. U. Tests with a pyrethrum aerosol against cockroaches and stored product pests. Ontario Ent. Soc. Ann. Rpt. 73 (1942): 61-63.

Smith, F. F., and Goodhue, L. D. Toxicity of nicotine aerosols to the green peach aphid, under greenhouse conditions. Jour. Econ. Ent. 36: 911-914.

## 1944

Barthel, W. F., Haller, H. L., and LaForge, F. B. Pyrethrins for aerosols. The preparation of 98 percent pure pyrethrins for use in Freon aerosol bombs. Soap and Sanit. Chem. 20(7): 121, 135.

Cowen, R. O. Aerosol bombs vs. spray insecticides. Soap and Sanit. Chem. 20(7): 111, 113.

Fales, J. H., and Goodhue, L. D. Aerosols vs. oil spray insecticides. A study of comparative efficiency. Soap and Sanit. Chem. 20(7): 107-108.

Goodhue, L. D. Insecticidal aerosols. Jour. Econ. Ent. 37: 338-341.

---- Military needs stimulate development of insecticidal aerosols. Chem. Indus. 54: 673-675.

---- The use of Freon in insecticides. Refrig. Engin. 47: 26-27.

---- and McGovran, E. R. Liquefied-gas method of producing germicidal aerosols. Science 99: 511-512.

---- and Smith, F. F. The effect of some insecticides in aerosol form against the cyclamen mite on snapdragon. Jour. Econ. Ent. 37: 214-218.

Gothard, N. J. Another view of aerosol efficiency. Soap and Sanit. Chem. 20(7): 113.

Hamner, C. L., Schomer, H. A., and Goodhue, L. D. Aerosol, a new method of applying growth regulators to plants. Science 99: 85.

Monro, H. A. U., Briand, L. J., Delisle, R., and Smith, C. C. Some experiments with the pyrethrum aerosol under Canadian conditions. Ontario Ent. Soc. Ann. Rpt. 74(1943): 42-45.

Rhodes, W. W. Liquefied gas aerosols--Postwar. Soap and Sanit. Chem. 20(7): 108-109.

Roark, R. C. New insecticides aid the war effort. Chem. and Engin. News 22: 1464-1469.

Smith, C. M., and Goodhue, L. D. Increase in concentration of insecticide in Freon-12 accompanying transfer or discharge of an aerosol-producing solution. Indus. and Engin. Chem., Analyt. Ed. 16: 355-357.

Smith, F. F., Goodhue, L. D., and Ballinger, W. R. Dispenser for aerosols and highly volatile fumigants. U. S. Bur. Ent. and Plant Quar. ET-216, 3 pp. [Processed.]

Wachs, H., Morriello, C., and Mages, S. Determination of Freon-insoluble solids in twenty percent pyrethrum extracts. Indus, and Engin. Chem., Analyt. Ed. 16: 453-454.

## 1945

Batt, G. H. New sprayer for testing aerosols. Soap and Sanit. Chem. 21(7): 117-118.

Ditman, L. P. Cheaper insect control possible. The Food Packer 26(6): 58, 60, 62.

---- Smith, F. F., Goodhue, L. D., and Bronson, T. E. DDT aerosols for pea aphid control. Jour. Econ. Ent. 38: 183-188.

Goodhue, L. D. Insecticidal aerosols. Sci. Monthly 61: 413-414.

---- New developments in insecticides. Iowa State Col. Jour. Sci. 19: 255-262.

---- Ballinger, W. R., and Fales, J. H. Improved dispenser for testing new liquefied gas aerosols. Jour. Econ. Ent. 38: 709-710.

---- Fales, J. H., and McGovran, E. R. Dispersants for aerosols. Soap and Sanit. Chem. 21(4): 123, 125, 127.

---- Smith, F. F., and Ditman, L. P. DDT in aerosol form to control insects on vegetables. Jour. Econ. Ent. 38: 179-182.

Lindquist, A. W., Travis, B. V., Madden, A. H., Schroeder, H. O., and Jones, H. A. DDT and pyrethrum aerosols to control mosquitoes and houseflies under semi-practical conditions. Jour. Econ. Ent. 38: 255-257.

Madden, A. H., Lindquist, A. W., and Knipling, E. F. DDT and other insecticides as residual-type treatments to kill bedbugs. Jour. Econ. Ent. 38: 265-271.

McKay, J. W., Burrell, P. C., and Goodhue, L. D. Applying colchicine to plants by the aerosol method. Science 101: 154-156.

Smith, F. F., Ditman, L. P., and Goodhue, L. D. Experiments with aerosols against some pests of truck crops. Jour. Econ. Ent. 38: 189-196.

Smith, F. F., Ditman, L. P., Goodhue, L. D., and Burkhardt, Geo. Self-propelled aerosol sprays for control of the pea aphid. Pa. Veg. Growers' News. 15(5): 97-99.

---- and Goodhue, L. D. DDT aerosols to control onion thrips and other pests in greenhouses. Jour. Econ. Ent. 38: 173-179.

1946

Dietz, W., and Shepherd, H. R. The expanding field for aerosols. Soap and Sanit. Chem. 22(12): 137-139.

Ditman, L. P. DDT aerosols to control worms in corn. Jour. Econ. Ent. 39: 668.

---- Goodhue, L. D., Smith, F. F., and Burkhardt, Geo. Insecticidal aerosols for pea aphid control - second report. Jour. Econ. Ent. 39: 199-204.

Ditsler, R. E. Aerosol marketing. Soap and Sanit. Chem. 22(7): 131, 133.

Fales, J. H., McGovran, E. R., and Goodhue, L. D. Aerosol toxicity - Effect of the nonvolatile content of a DDT aerosol on mortality of houseflies. Soap and Sanit. Chem. 22(6): 157-158.

Gersdorff, W. A., and Barthel, W. F. Determination of pyrethrins deterioration. The solubility of pyrethrum concentrates in dichlorodifluoromethane as a measure of their deterioration in insecticidal effectiveness. Soap and Sanit. Chem. 22(10): 155, 157.

Goodhue, L. D. Aerosols and their application. Jour. Econ. Ent. 39: 506-509.

---- The evaluation of liquefied gas aerosol solutions. Soap and Sanit. Chem. 22(2): 133, 165.

---- and Ballinger, W. R. Accelerated aging test for insecticidal aerosols containing DDT. Indus. Engin. Chem. Analyt. Ed. 18: 131-132.

---- and Riley, R. L. Particle-size distribution in liquefied gas aerosols. Jour. Econ. Ent. 39: 223-226.

Hazen, A. C., and Goodhue, L. D. Insecticidal aerosols. Stability in storage studied by accelerated aging tests. Soap and Sanit. Chem. 22(8): 151, 153, 155.

Lindquist, A. W., Travis, B. V., Madden, A. H., and Jones, H. A. Aerosol formulation. Laboratory tests with pyrethrum and DDT aerosols against the common malaria mosquito and the housefly. Soap and Sanit. Chem. 22(5): 135, 137, 139, 141, 143.

McGovran, E. R., and Fales, J. H. Toxicity of aerosols. Rate of movement through and height of suspension in a toxic aerosol influences mortality of cage house flies. Soap and Sanit. Chem. 22(9): 127-129.

---- Fales, J. H., and Goodhue, L. D. New formulations of aerosols dispersed by liquefied gases. Jour. Econ. Ent. 39: 216-219.

Madden, A. H., Schroeder, H. O., Knipling, E. F., and Lindquist, A. W. A modified aerosol formula for use against mosquitoes and houseflies. Jour. Econ. Ent. 39: 620-623.

Markwood, L. N. The aerosol - something new in insecticides. U. S. Dept. Com., Dom. Com. 34 (11): 50-56.

Owens, H. B., and Ditman, L. P. Liquefied gas aerosols to control insects on eggplant. Jour. Econ. Ent. 39: 405-406.

## 1947

Anonymous. What the U.S.D.A. says about aerosols. Florists' Exch. 109(12): 14, 16.

Anderson, L. D., and Brooks, J. W. Pea aphid control in eastern Virginia. Jour. Econ. Ent. 40: 199-205.

Chabot, E. D. Greenhouse pest control is easy. Flower Grower. 34: 41-42, 62.

Cory, E. N. Truck growers beat their swords into plow shares. South. Planter 108(12): 24-25.

Ditman, L. P., Burkhardt, Geo., Smith, F. F., and Goodhue, L. D. Liquified-gas aerosols containing DDT for control of vegetable-crop insects. Chemur. Digest 6: 94-95.

---- Smith, F. F., and Burkhardt, Geo. Liquefied gas aerosols for pea aphid control. Third report. Jour. Econ. Ent. 40: 190-194.

Fales, J. H., McGovran, E. R., and Fulton, R. A. Gamma benzene hexachloride in the liquefied-gas aerosol. Jour. Econ. Ent. 40: 754.

Fulton, R. A., and Berlin, F. D. A glass container for use in studying aerosol solutions. U. S. Bur. Ent. and Plant Quar. ET-246, 2 pp. [Processed.]

---- Berlin, F. D., and Bochert, R., Jr. A laboratory method for filling aerosol containers. U. S. Bur. Ent. and Plant Quar. ET-245, 2 pp. [Processed.]

Gaddis, C. H., and Goodhue, L. D. Treatment of aeroplanes to prevent accidental transportation of Japanese beetles. Jour. Econ. Ent. 40: 240-244.

Goodhue, L. D. Determination of Freon-insolubles in pyrethrum extract. Soap and Sanit. Chem.23(1): 133, 135.

---- and Hazen, A. C. The viscosity and density of four liquefied gas aerosol solutions containing DDT. Indus. and Engin. Chem., Analyt. Ed. 19: 248-250.

---- Schultz, F. S., and Wilkins, P. H. Aerosols shoot for mass market. (With low pressure propellants, cheap containers). Chem. Indus. 61: 602-604.

Hall, D. J. A new rival for DDT, hexaethyl tetraphosphate. Flower Grower. 34: 339, 362.

Haller, H. L. Wartime development of insecticides. Indus. and Engin. Chem. 39: 467-473.

Latta, R., and Goodhue, L. D. Aerosols for insects. Yearbook of Agriculture, U. S. Dept. Agr. 1943-1947, pp. 622-627.
